Town of Hanson

HANSON COMMUNITY POWER

Monday, November 2

The Town of Hanson's electricity supply program, Hanson Community Power, has been renewed, with a new supplier and new prices taking effect in December 2026.

Hanson is a Town-run electricity supply program, designed to provide stability protecting against seasonal energy price changes while offering alternatives to increase renewable energy use. The program prices only apply to the Supply portion of your electric bill. National Grid continues to set the Delivery charges on your electric bill, deliver power, respond to outages and send the electricity bill.

You currently receive one of Hanson Community Power's supply option. You will automatically receive the new price for your current supply option unless you make an alternative choice.

NEW PROGRAM OPTIONS

All new Hanson product prices are fixed for 12 months from December 2026 until December 2027.

HANSON BASIC	HANSON STANDARD	HANSON PLUS
15.836 ¢/kWh	**16.221 ¢/kWh**	**16.842 ¢/kWh**
No additional renewable energy	Adds 10% renewable energy	Adds renewable energy to total 100%
69% in 2026	79% in 2026	100% in 2026
75% in 2027	85% in 2027	100% in 2027

All program supply options costs less than National Grid's current Basic Service residential rate of 17.185 ¢/kWh in effect from August 1, 2026 – January 31, 2027.

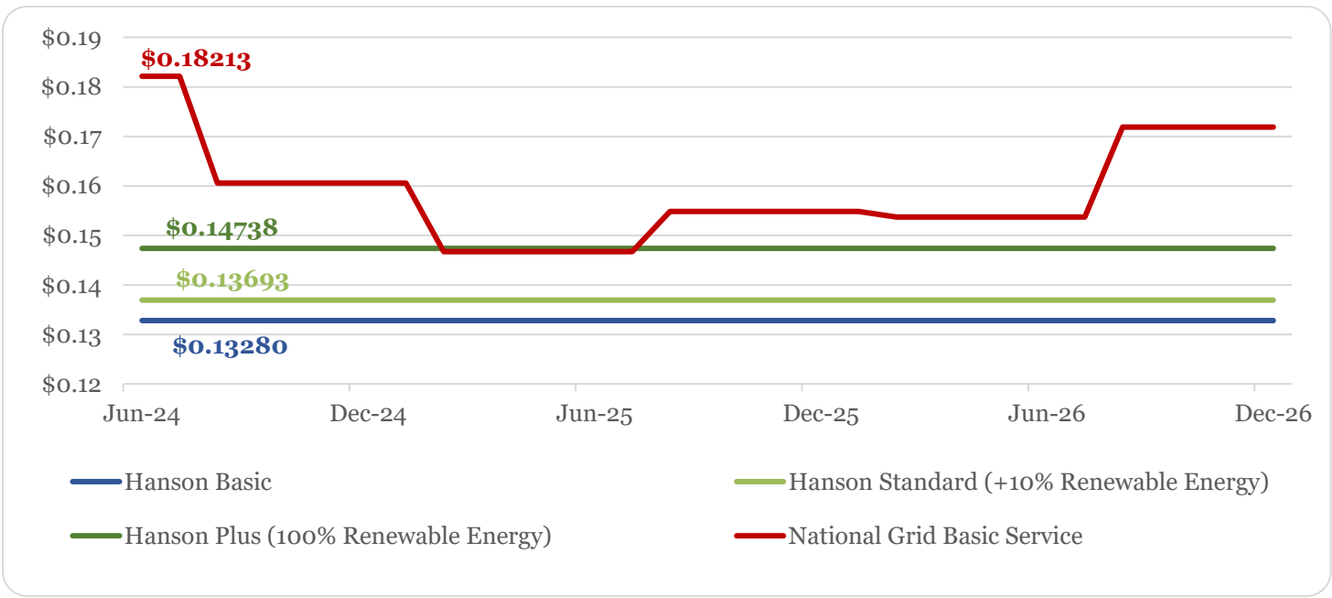

Because National Grid prices change frequently and future prices are unknown, future savings cannot be guaranteed.

No action is necessary to receive the new pricing for your current Hanson supply option. You may switch to another Hanson supply option at any time OR leave the program at any time, without penalty, and return to Basic Service with National Grid. To switch options or leave the program, call our program's new electricity supplier, Constellation, at (877) 685-3772 or submit a request at HansonCommunityPower.com.

PROGRAM HIGHLIGHTS

Since Hanson's program launched in 2024 it has saved $806,000 for the community compared to National Grid's supply cost. As illustrated below, Hanson supply prices have remained stable for over two years while National Grid Basic Service prices have steadily increased since last summer.

The program has also provided cleaner electricity, sourcing voluntary renewables from New England-based Class I sources. These voluntary purchases now amount to 1,920 megawatt hours (MWh) annually, avoiding 1.3 million pounds of carbon pollution each year.

Program Comparison of Current & New Prices

Most participants receive the Hanson Standard supply at the "Current" price shown below, unless you have taken action to enroll in another program option. If you are unsure, match the price shown in the "Supply" section of your National Grid bill to the "Current" price shown below.

	Current Hanson Supply Options			New Hanson Supply Options		
	Hanson Basic	**Hanson Standard**	**Hanson Plus**	**Hanson Basic**	**Hanson Standard**	**Hanson Plus**
Price	13.280 ¢/kWh	13.693 ¢/kWh	14.738 ¢/kWh	15.836 ¢/kWh	16.221 ¢/kWh	16.842 ¢/kWh
Duration	30 months: June 2024 until December 2026 meter reads			12 months: December 2026 until December 2027 meter reads		
	Renewable Energy Content in 2026 (% of total)			**Renewable Energy Content in 2027** (% of total)		
State Required	69%	69%	69%	75%	75%	75%
Voluntary (Class I sources)	No additional renewable energy	Adds 10% renewable energy	Adds renewable energy to total 100%	No additional renewable energy	Adds 10% renewable energy	Adds renewable energy to total 100%
Total	69%	79%	100%	75%	85%	100%
Supplier	Direct Energy			Constellation		

Important Information

- **If you remain in your current program supply option,** the first bill to show the new pricing will be the bill you receive showing usage from your December 2026 to January 2027 meter read. Most customers can expect to receive this bill in January 2027. National Grid will continue to deliver your electricity and send your monthly electric bill.
- **If you are a tax-exempt commercial customer,** to maintain your status, you must provide a copy of the tax-exemption certificate directly to Constellation via email at CNETaxForms@constellation.com, or mail to Attn: Tax Team, 1001 Louisiana Street, Suite 2300, Houston, TX 77002.
- **If you receive electricity supply from a competitive supplier,** you may have signed up after this letter was created. To continue to receive your electricity from that competitive supplier and prevent any possible early termination fees, you must opt out of this program by using the online form at HansonCommunityPower.com or by calling the program supplier at (877) 685-3772 .
- **If you want to remove or check if you have a supplier block,** contact National Grid at (800) 322-3223. If you have a block and do not remove it, your account will be returned to National Grid Basic Service on your December 2026 meter read.
- **If you have questions about the program's voluntary renewable energy,** visit the program website: HansonCommunityPower.com. MA Class I sources come from new renewable energy facilities located within, or delivered to, New England, and were built after 1997. Wind, solar, and low-impact hydropower are some of the most common sources that qualify for Class I.
